Page 4 Operation/Technical Manual NORM-O-TEMP , Model 111W @ Cincinnati Sub-Zero Products, LLC, reserves the right to make changes to the device, which may not be reflected in this manual. Operation / Technical Manual NORM-O-TEMP , Model 111W @ 1-3.5. External Features and Descriptions - Top View The membrane control panel as shown in Figure 5 is composed of pressure sensitive touch switches and LED displays. Replacement of the Power Switch A. Operation / Technical Manual NORM-O-TEMP , Model 111W @ 6-5. Independent Mechanical High Temperature Safety Alarm 1. Copyright 2018 Cincinnati Sub-Zero Products, LLC. (No unusual dents or missing parts.) 2. NORM-O-TEMP unit, Model 111W Top View. Page 79 Operation / Technical Manual NORM-O-TEMP , Model 111W @ The following tables are presented in fulfillment of the requirements of IEC 60601-1-2 Guidance and manufacturer's declaration - electromagnetic emissions The NORM-O-TEMP , Model 111W is intended for use in the electromagnetic environment specified below. Unit is set to operate. Reconnect the hose from the water reservoir to the inlet at the center of the pump housing and tighten the clamp. Obtain a replacement water filter assembly. Attach and tighten the male couplings to the water manifold. The NORM-O-TEMP hyperthermia system is composed of a heater, @... F. Position the top of the unit face down on a padded work space. Operation / Technical Manual NORM-O-TEMP , Model 111W @ In addition, the circulating reservoir contains a low water level sensor which shuts down the unit and sounds an alarm if the water level drops below 1 ½ quarts (1.4 liters). NORM-O-TEMP unit, Front View @ Page 15 of 82... Specifications and Certifications Specifications for the NORM-O-TEMP are presented in Figure 6 and are subject to @ change without notice. Light is on. E. Avoid prolonged tissue pressure and shearing forces over bony prominences. Push the female Hansen socket of the hose over a male Hansen plug of the unit iv. The water flow indicator is a paddle wheel immersed in the path of the circulating water with a window to the outside. Operation / Technical Manual NORM-O-TEMP , Model 111W @ 6-1.2. Replace / Reinstall the Top of the Unit Re-install top as it was removed in Section 6-1.1. NOTE: When securing the top, be sure the fill spout gasket inner lip on the aluminum cover top is in the up position and the fill spout goes directly into it. This entails unpacking the shipment, arranging all the equipment for the first time, and completing a test routine. Fill the reservoir with warm distilled water. Secure the three-sided enclosure panel as described in Section 6-1.4. O. Page 2 Operation/Technical Manual NORM-O-TEMP , Model 111W @ NORM-O-TEMP , MAXI-THERM , MAXI-THERM LITE, Gelli-Roll and PLASTI-PAD are registered @ @ @ trademarks of Cincinnati Sub-Zero Products, LLC, Cincinnati, Ohio USA. Maintenance of Water Reservoir The dual compartment reservoir holds approximately 1½ gallons (5.7 liters) of distilled water that remains in the unit between periods of use. Page 67 Operation / Technical Manual NORM-O-TEMP , Model 111W @ Observation Possible Problem Action To Be Taken M. Operation / Technical Manual NORM-O-TEMP , Model 111W @ ii. Check reservoir water level and fill if necessary 2. Operation / Technical Manual NORM-O-TEMP , Model 111W @ Section 3. Identification of parts and components are shown in Figure 8, Figure 10, and Figure 12. WARNING A physician's order is required for the use of the device and setting the temperature of the blanket/pad. Page 34 Operation / Technical Manual NORM-O-TEMP , Model 111W @ E. All rights reserved, but fluid does not heat. Shipping Parts Parts to be returned to the factory should be carefully packaged, especially the micro-processor board and the control panel. Page 41 Operation / Technical Manual NORM-O-TEMP , Model 111W @ D. Changes in skin color, edema, inflammation, or indications of pressure, especially over bony prominences, should be noted and treated as ordered. Microprocessor control Replace the microprocessor When the unit goes through board malfunctioned. Operation / Technical Manual NORM-O-TEMP , Model 111W @ Membrane control panel B. Always use CSZ recommended blankets/pads. Operation / Technical Manual NORM-O-TEMP , Model 111W @ 5-3. Operation / Technical Manual NORM-O-TEMP , Model 111W @ 1-3.4. External Features and Descriptions - Right Side View The external features in Figure 4 of the NORM-O-TEMP unit are described as @ follows: A. Connect the hose from the pump housing to the copper elbow of the manifold and tighten the clamp. Field Repair / Service of the NORM-O-TEMP @ WARNING The repair, calibration, and servicing of the NORM-O-TEMP should be @ performed by a qualified Medical Equipment Service Technicians, Certified Biomedical Electronics Technicians, or Certified Clinical Engineers familiar with good repair practices for servicing medical devices, and in accordance with instructions contained in this manual. A beeper sounds. NORM-O-TEMP Water Circulation Diagram @ Page 77 of 82... Adult or O.R. Table Size (22" x 60") Infant Size (12" x 18") Contents: 5/box, 4 boxes/case Reusable Connecting Hose (for CSZ Unit) MAXI-THERM LITE Single-Patient Use Blanket(pad)s Adult Size (25" x 64") Pediatric Size (25" x 33") Infant Size (12.5" x 33")... After the water has been allowed to cool below 37°C, verify that the jumpers are in the correct position by turning the unit on and allowing it to heat to 37°C. The seven segment display reads CAL for several seconds. Replacement of the Water Filter Assembly. Operation / Technical Manual NORM-O-TEMP , Model 111W @ Figure 15. 1-5-3. Operation / Technical Manual NORM-O-TEMP , Model 111W @ Section 2. If any other maintenance/repair is to be completed, go to the appropriate section, e.g., cleaning the water filter. See Section 6-2. Operation / Technical Manual NORM-O-TEMP , Model 111W @ NORM-O-TEMP , Model 111W The NORM-O-TEMP , Model 111W hyperthermia System is used to keep a patient @ comfortable by maintaining blanket/pad water temperature through conductive heat transfer. Operation / Technical Manual NORM-O-TEMP , Model 111W @ Figure 10. Operation / Technical Manual NORM-O-TEMP , Model 111W @ Index # I.D. # Description 57208 Control Panel 230/240 VAC 91628 Top Assembly 230/240 VAC 60033 (4) #8 Phillips Screws 60180 (4) 6/32" Brass Nut 57027 (6) 3/8" Stand Off 60180 6/32"... Remove the top of the unit as described in Section 6-1.1. C. The threads of the replacement water sensor should be sealed with teflon tape. control board. Operation / Technical Manual NORM-O-TEMP , Model 111W @ H. Page 8 Operation/Technical Manual NORM-O-TEMP , Model 111W @ 6-1. Required Accessories Operation of the NORM-O-TEMP unit requires the use of the blanket(pad)s designed @ to circulate warm water via a connecting hose with quick-disconnect male and female couplings. Using a 5/16 inch wrench, remove the six nuts and star washers on the edge of the board E. Operation / Technical Manual NORM-O-TEMP , Model 111W @ P. For proper knowledge and understanding of the unit, in-service training is available upon request. Operation / Technical Manual NORM-O-TEMP , Model 111W @ The description of each task includes the tools, the procedures and the precautions necessary to complete the task. J. To completely disconnect the device from the power source, remove the power cord plug from the power source. 19 @ Figure 4. Operation / Technical Manual NORM-O-TEMP , Model 111W @ Section 5. If a single-patient use hyper-hypothermia blanket/pad is used, connect the couplings of the connecting hose to the blanket/pad as described in the instructions packaged with each blanket/pad. Operation / Technical Manual NORM-O-TEMP , Model 111W @ 5-1.2. Internal Cleaning and Disinfection Using Gigasept FF / Dry Storage Procedure For Circulating Water Units Utilizing CE Approved Gigasept FF (Product of Schulke & Mayr) (Contact your local Cleaning Supplier). The membrane control panel is divided into the following sections: A. If not, go to Section 5-1.5 to replenish the reservoir. The following procedure disinfects the fluid circuit in these products. defective. It lights up green but the control panel is blank/ the cable(s) that connect(s) Reconnect the 12-pin and 9-... Secure the top of the unit as described in Section 6-1.2. 6-15. To drain the water from the reusable blanket/pad simply shut off power to the unit and allow the water to drain from the blanket/pad back into the NORM-O-TEMP unit. Slide the collar back towards the hose iii. The customer or the user of the @ NORM-O-TEMP , Model 111W should assure that it is used in such an environment. 2. Turn the unit on and circulate per the Chemical Cleaning Circulation Chart (above). A. Operation / Technical Manual NORM-O-TEMP , Model 111W @ 1-3.3. External Features and Descriptions - Rear View The external features in Figure 3 of the NORM-O-TEMP unit are described as @ follows: A. Operation / Technical Manual NORM-O-TEMP , Model 111W @ M. Connect the water temperature sensor. G. Operation / Technical Manual NORM-O-TEMP , Model 111W @ Operating the NORM-O-TEMP System @ Section 4. ... Maintenance of the NORM-O-TEMP Exterior - Cleaning Instructions @ The NORM-O-TEMP unit is constructed of powder coated steel with a plastic top @ that should be cleaned quarterly with water and mild detergent solution. Turn "OFF" power switch. NORM-O-TEMP unit, Right Side View ..... Apply three (3) wraps of teflon tape around the threads of the replacement heater. Once a month the water reservoir should be drained and replenished. C. General Maintenance of the NORM-O-TEMP System @ 5-0. Make sure that the power switch is in the "I" position (unit is turned on). Operation / Technical Manual NORM-O-TEMP , Model 111W @ Figure 1. Page 3 Operation/Technical Manual NORM-O-TEMP , Model 111W @ SYMBOLS Caution: Read Fuse Temperature Set Operation Instructions and Manual Before Operating Increasing Silence Alarm Water Temperature Temperature Decreasing Fill to Strainer Temp. Make sure the copper elbow points down. The microprocessor board goes through self-test. Connect drain hose to one of the outlet fittings and allow to gravity drain. Troubleshooting Guide CAUTION This device is still energized when the power switch is in the off position. 4-0. Return Material Authorization (RMA) Number.
